EXPERIENCE

- Spearheaded development and implementation of full stack and AI solutions as a Full Stack/AI Solutions Developer at Beenear, driving business growth and enhancing system efficiency since 2019
- Analyzed and resolved technical issues, improved system performance, and reduced downtime as a Technical Analyst/Full Stack Developer at UBIS for 3 years
- Designed and developed full stack applications as a Full Stack Developer at BSS ONE for 9 months, delivering high-quality solutions and meeting project deadlines

EDUCATION

- Earned a Bachelor's Degree in Economic Informatics from the University of Alexandru Ioan Cuza, Iași
- Obtained a High School Qualification in C++

SKILLS

- Utilized AI and LLM integration tools, including OpenAI, Cohere AI, and LLM Flow Optimization to drive business results and improve system efficiency
- Utilized C#, Node.js, and Vue.js to design and develop scalable full-stack applications, resulting in increased application performance
- Applied Python, Databricks, and Azure Data Factory to manage and process large datasets, reducing data processing time
- Worked with various databases including Cosmos DB, PostgreSQL, and Microsoft SQL, ensuring high database uptime
- Utilized Azure, Git, and YAML to configure and manage DevOps environments, resulting in reduced deployment time
- Developed projects using Python, FastAPI, Uvicorn, Supabase, ReportLab, and Groq API, delivering high-quality solutions
- Possess experience with legacy systems, including JCL, Pascal, DB2, and SAP Universe, ensuring seamless integration with modern systems

LANGUAGES

- English: full professional proficiency
- Italian: full professional proficiency
